

- What participants have said about this course -

What I like most about this training class is the approach of clarifying and reinforcing the information contained in the standards and "Real World" scenarios and examples. I feel the HISP Course is a valuable investment for information security, auditing and IT professionals who are involved in assisting enterprises with developing strategic directions, planning, ensuring compliance, and integrating ISO 17799, COBIT and ITIL!

Chief Information Security Officer (CISO) -Georgia State University

I would recommend this instructor and training course to others.

Product Group -Microsoft Corporation

What I liked about this training - "Excellent course that tied everything together from a regulatory and control aspect. Provided me the ability to map the various standards together with clear understanding".

Director, Information Risk Management & Security -Masterlink Corporation

What I liked about this training - "Excellent holistic view with very relevant and practical real world cases".

IP Security Architect -Bell Aliant, Canada

What I liked about this training - "It was the ISO training that attracted me to this course. I particularly enjoyed the informal discussions that arose during class which gave me different perspectives and views on the many business security issues".

Security Analyst -Ontario Smart Systems for Health Agency (SSH), Canada

What I liked about this training - "Content, interaction with other students, especially those from different fields".

Sales Manager, BSI Management Systems

What I liked about this training - "Small group; interaction with BSI team; enthusiastic instructor; great workshops".

Accounts Manager, BSI Management Systems

What I liked about this training - "The comprehensive coverage of ISO requirements followed by mapping to COBIT, COSO and ITIL was very relevant".

Accounts Manager, BSI Management Systems

What I like most about this training class is the broad scope of material and many industries/skill sets across participants.

Senior Software Engineer -Level 3 Communications

What I like most about this training class is that the amount of information supported the idea of the holistic nature.

Senior Consultant -Plexent

What I like most about this training class is that the course content and details are so rich and very applicable to different business types and operations.

Research Analyst -eFortresses, Inc.

Though brief, the walk through of the Compliantz tool was very interesting. I look forward to the investigating the possible use of the Compliantz tool in my IS Audits.

Insurance Examiner -Huff Thomas & Co

What I like most about this training class is the connective aspects of ISO (completely security focused) with other frameworks such as COBIT (SOX and IT Management), HIPAA (Health Organizations).

Technology Risk Management Consultant - Jefferson Wells

What I like most about this training class is that it addresses a very timely and important issue in the corporate world -Compliance management. Also, the group-based case studies were a good break from lecture and reinforced the concepts.

Manager of Data Security -AirTran Airways

What I like most about this training class is that it supported the holistic approach to information security and proved that while you cannot ignore the regulatory obligations you can certainly take the common sense and cost effective approach in meeting them.

Product Manager -Business Continuity, British Standards Institute

What I like most about this training class is that the training provided me with the tools to effectively manage my compliance concerns. The knowledge I have gained during the week will help me better prepare my company for regulatory compliance. Also, due to the interactivenss of the instructor and the class, I never lost focus. Thank You.

Network Operations Manager, ATMI

What I like most about this training class is that it helps me to prepare for the DITSCAP to DIACAP conversion in the DoD C&A process.
